

The UN sustainable development goals

The UN SDGs call on governments, businesses and others around the world to meet three key objectives by 2030: to end extreme poverty, fight inequality and injustice and limit climate change. They translate into 17 goals (shown here) and 169 targets.

Achieving these Global Goals is essential for the good of society, the environment and sustainable economic growth. If the world can't address global challenges effectively, national economies could slow down. This could have a knock-on effect on our business.
