

Additional Camera  
Video Baby Monitor 7000  
User guide

## Getting set-up

- 1 To get the best performance, place your Additional camera between one and two metres away from your baby.
- 2 Plug one end of the micro USB cable into the power plug and the other end into the Additional camera.
- 3 Plug the power plug into the power socket and switch the power on.

## Pair to your Parent unit

- 1 Ensure you are at least 2-3 metres away from the Additional camera and enter the **Menu** of your Parent unit.
- 2 Tap **Cameras**, then tap **Pair Additional Camera**.
- 3 Follow the on screen prompts and press and hold the  Nightlight button on the Additional camera for 10 seconds. The units will automatically pair together.

## Multi cam mode

When you have more than one Baby unit (camera) paired to your Parent unit, the signal icon  in the middle of the top row of the Parent unit screen will change to the multi cam icon .

You can tap on the multi cam icon  to choose which camera you want to view.

## Audio cycling feature

You can switch the audio cycling feature on to rotate the audio between your active paired cameras. The audio will rotate every 10 seconds. No cry alerts will be shown in multi cam mode when audio cycling is on.

- 1 Tap the Audio Cycle icon  to switch on.

The screen will show **“Audio will rotate between all paired cameras”** for 5 seconds and the icon will turn green.

- 2 To turn off, tap  again. The icon will turn grey.
